

SOUTH CARLETON HIGH SCHOOL
Ottawa-Carleton District School Board
 STUDENT OUTLINE
TCJ 20
 Construction Technology
 Grade 10

Credit Value: 1.0

Hours: 110

Prerequisite: none

Course Overview

This course introduces students to building materials and processes through opportunities to design and build various construction projects. Students will learn to create and read working drawings; become familiar with common construction materials, components, and processes; and perform a variety of fabrication, assembly, and finishing operations. They will use a variety of hand and power tools and apply knowledge of imperial and metric systems of measurement, as appropriate. Students will develop an awareness of environmental and societal issues related to construction technology, and will explore secondary and postsecondary pathways leading to careers in the industry.

Specific Expectations

Unit Title	Specific Expectations	Approximate Timelines
Tool and Equipment Techniques	explain how to correctly and safely use, maintain and store construction tools and equipment	3 weeks
Technical Skills	perform the various measurements required in the fabrication and assembly of a project, using appropriate metric and imperial units.	10 weeks
Fabrication and Assembly	apply appropriate quality-control measures to ensure precise dimensions and correct assembly	7 weeks

Accommodations for Exceptional Students

The technology department makes every effort to accommodate the identified needs of exceptional (IPRC'd) students and will attempt to differentiate curriculum delivery methods, student modes of expression, and assessment methods as recommended by the student's individual education plan (IEP).

Teaching Strategies

Units are activity based. Teacher demonstrates and research activities provide the students with the necessary terminology and methodology to complete the activities. Classroom discussions, collaborative and co-operative learning, research, report writing and taking notes will assist students in meeting the course expectations. Upon completion of this course, students will demonstrate the ability to apply skills and knowledge to practical situations that involve the completion of work assignments and problem-solving activities. Students will be expected to use the Internet to find resources for their projects.

Resources/Textbooks/Technological Integration

A series of in-house workbooks

Evaluation

Term Report	Final Report	
<i>Assessment/Evaluation tools include tests/quizzes, assignments, performance tasks and rich assessment tasks</i>	Term	70%
	Summative task	20%
	Final Exam	10%
		100%
Term	70%	

Key Evaluation Dates:

Technological Studies summatives will come due within the school's Summative and Evaluation Period between January 13th and 24th and June 2nd to June 17th.

Absence from evaluations during these dates must be substantiated with a medical certificate or equivalent documentation as approved by administration.

Classroom Management

Due to the nature of the technology classroom, no food or beverages, jackets or bags can be allowed. Adherence to school Internet use policy will be strictly enforced. Noncompliance will result in the removal of computer privileges for the students for an indeterminate period of time.
