Dear D51 Families and Colleagues:

Happy everyone had a wonderful Thanksgiving break. It is always nerve-wracking on Thursday and Friday nights when our family can usually anticipate some treats right up top good food and good company. Today, I hope you can do the same.

This year, our theme is always a place where we can still take pride in our students. I am always excited about our students’ accomplishments. I am excited to see them grow and do what they love to do in the classroom and outside the classroom. I am excited to see their growth and passion for learning. I am excited to see them reach their goals and achieve their dreams.

We have received many letters and emails from our students’ parents this year. They have shared their stories of how their children are succeeding in school and in life. They are proud of their children and want to share their success stories. They want to see their children reach their goals and achieve their dreams.

We are proud of our students and their accomplishments. We are proud of their hard work and dedication. We are proud of their personal growth and development. We are proud of their success in school and in life.

We are excited to see our students continue to grow and succeed. We are excited to see them reach their goals and achieve their dreams. We are excited to see them grow and do what they love to do.

Thank you for being a partner with us in our work towards our Strategic Plan focus areas of having Prepared & Supported Students. We are excited to participate in the largest education event in history; Hour of Code. This event is open to anyone who wants to learn about computer science and encourage others to do the same.

Next week, December 5 through 11, is Computer Science Education Week, and District 51 will participate in the Hour of Code event. We encourage everyone to participate and help spread the word about this important event.

We are excited to participate in this event and support our students in learning about computer science. We are excited to see our students reach their goals and achieve their dreams. We are excited to see them grow and do what they love to do.

Sincerely,

Brian Hill
